

Redotpay Referral Code "rjvq1" — Get \$10 Bonus on Your First Card Activation

■ Quick Answer

Enter referral code **rjvq1** during RedotPay sign-up, complete identity verification (KYC), then activate your first virtual or physical Visa card to unlock a **\$10 welcome bonus**. The code must be added at registration and cannot be applied to existing accounts.

What Is the RedotPay Referral Code rjvq1?

The RedotPay referral code **rjvq1** is an invitation code that new users enter during account registration to unlock a **\$10 welcome bonus** on their first card activation. RedotPay is a Hong Kong-based crypto payments platform that issues Visa prepaid cards funded by stablecoins such as USDT and USDC. The referral code connects a new user's account to an existing member's network, triggering the promotional reward once the card activation milestone is reached. This incentive structure is part of RedotPay's invite-and-earn ecosystem designed to reward both referrers and new users who join through a valid invitation link.

About RedotPay: The Platform Behind the Code

RedotPay is a stablecoin-based crypto card and payments platform founded in 2023 and licensed in Hong Kong. It bridges the gap between digital asset holdings and everyday spending by issuing Visa cards that work at over 130 million merchants worldwide. Users load their cards with cryptocurrencies including USDT, USDC, BTC, ETH, and SOL, which are converted to fiat currency at the point of sale.

The platform is backed by a strong institutional investor lineup including Coinbase Ventures, Lightspeed, Accel, Pantera Capital, and Galaxy Digital. Institutional-grade custody is provided through Fireblocks, and the platform holds PCI DSS 4.0 certification. User assets are insured up to \$42 million, making it one of the more security-focused crypto card solutions available to retail users outside the United States.

Core Platform Features

- **Multi-Currency Wallet** — hold USDT, USDC, BTC, ETH, SOL, and 20+ other cryptocurrencies in one place
- **Visa Prepaid Card** — accepted at 130M+ merchants across 100+ countries with no monthly fee
- **P2P Marketplace** — buy and sell stablecoins in 50+ local currencies with zero trading fees and instant settlement
- **Earn (Yield)** — generate daily rewards on USDT and USDC balances, calculated at midnight UTC
- **Crypto Credit** — use BTC, ETH, SOL, USDT, and other assets as collateral for spending credit without credit checks

- **Global Transfers** — send funds to bank accounts and e-wallets with minimal friction
- **Apple Pay and Google Pay** — link your virtual card for tap-to-pay on any NFC-enabled terminal

How the rjqv1 Referral Code Works

When you sign up for RedotPay and enter the referral code **rjqv1** in the Referral Code (Optional) field on the registration screen, the system links your new account to the referrer's network. The \$10 bonus is unlocked once you complete identity verification and activate your first card. According to RedotPay's official help center, the referral code cannot be added to an existing account, so entering it at the moment of registration is the only valid window.

Important Rules for Code rjqv1

- Enter the code **during registration only** — it cannot be applied retroactively to an existing account.
- The bonus is tied to **card activation**, not just sign-up, meaning the \$10 reward is credited after your first virtual or physical card becomes active.
- The welcome bonus is **valid for 30 days** from the date you receive it and is intended for purchases, not card issuance fees.
- New users only — the promotional reward applies exclusively to first-time RedotPay registrations.
- If a friend uses a discount code of 50% or more on card purchase, the referrer may not receive the card-order commission.

How to Claim Your \$10 Bonus: 5 Easy Steps

1 Step 1 — Download the App and Start Registration

Download the RedotPay app from the App Store (iOS) or Google Play (Android). Open the app and select the option to create a new account. You can register using your email address or mobile number. Choose a strong password before proceeding.

2 Step 2 — Enter Referral Code rjqv1 at Sign-Up

On the registration screen, locate the field labeled **Referral Code (Optional)**. Tap the field and type **rjqv1** exactly as shown. This is the critical step — the code must be entered here and cannot be added later. Confirm the code is accepted before moving forward.

3 Step 3 — Complete Identity Verification (KYC)

RedotPay requires full KYC verification before card issuance. Upload a government-issued photo ID and complete a selfie or liveness check through Sumsb, the platform's KYC provider. Most verifications are approved within minutes, though some cases take up to one business day.

4 Step 4 — Fund Your Account with Crypto

Deposit supported cryptocurrencies into your RedotPay wallet. USDT via the TRC-20 network is the most cost-effective option due to low network fees. You can also deposit via BTC, ETH, USDC, SOL, and other supported assets, or top up through Binance Pay and supported third-party transfers.

5 Step 5 — Activate Your First Card to Unlock the \$10 Bonus

Navigate to the Card section of the app. Order a virtual card for a one-time \$10 USDT issuance fee (activated in 5 to 10 minutes) or a physical Visa card for a \$100 USDT fee. Once the card activation is confirmed, your \$10 welcome bonus is credited and available for purchases at any of RedotPay's 130M+ supported merchants worldwide.

Virtual Card vs Physical Card: Side-by-Side Comparison

RedotPay offers two card types. Choosing the right one depends on your primary use case, whether online spending or in-store and ATM access.

Feature	Virtual Card	Physical Visa Card
Issuance Fee	\$10 USDT (one-time)	\$100 USDT (one-time)
Delivery Time	5 to 10 minutes	Ships to supported countries
Online Purchases	Yes	Yes
In-Store Payments	Via Apple / Google Pay	Yes (tap or chip)
ATM Withdrawals	No	Yes
Card Network	Visa	Visa
Spending Limit	Up to \$100K per transaction	Up to \$100K per transaction
Best For	Online shopping, subscriptions	Travel, in-store, cash access

RedotPay Fee Structure at a Glance

Understanding the full fee picture helps you maximize the value of your \$10 welcome bonus and plan your crypto spending efficiently.

Fee Type	Amount	Notes
Virtual Card Issuance	\$10 USDT	One-time, non-refundable
Physical Card Issuance	\$100 USDT	One-time, ships globally
Monthly Maintenance	\$0	No recurring fees
FX Conversion Fee	1.2% to 2.2%	Applies on non-USD merchants

Fee Type	Amount	Notes
ATM Withdrawal Fee	~2% to 4.2%	Physical card only
Card Top-Up via Debit	~3%	Fiat card funding surcharge
Stablecoin Deposit	Network gas fee only	TRC-20 USDT is cheapest
P2P Marketplace	\$0 trading fee	Stablecoin trades only
Earn (Yield)	Daily rewards credited	USDT and USDC supported

RedotPay Referral Program: Earn Beyond the Signup Bonus

Once you have your own account set up, you can generate passive income by sharing your personal referral code with others. RedotPay's tiered commission system rewards you each time a referred user takes a qualifying action. Commissions are paid in USDT and deposited directly into your wallet balance.

- **Card Order Commission** — earn a percentage of the card issuance fee when your referred friend orders a virtual or physical card. These commissions are paid instantly upon confirmation.
- **Spending Commission** — earn a percentage of your friend's transaction amount every time they use their RedotPay card. Settled every 30 days.
- **Secondary Commission** — if your referred friend also invites someone new, you earn 10% of your friend's commission on that secondary referral automatically.
- **Tiered Level System** — the more users you invite, the higher your referral level rises, unlocking progressively higher commission rates across all reward categories.
- **Partner Program** — users with large audiences can apply for RedotPay's Partner Program through the referral page, gaining access to even higher commission rates and dedicated support.

To access your referral link and personal invitation code, open the RedotPay app and navigate to the Benefits or Referral section. From there you can copy your unique code, share it via any messaging platform, and track your commission earnings in real time.

Supported Cryptocurrencies for Card Funding

Asset	Networks Supported	Best Use Case
USDT	TRC-20, ERC-20, Polygon, Arbitrum, SOL	Lowest-cost top-up (TRC-20 recommended)
USDC	ERC-20, Polygon, Arbitrum, SOL	Stable spending, Earn yield
BTC	Bitcoin, Lightning	Store of value, large top-ups
ETH	Ethereum, Arbitrum	Smart contract users

Asset	Networks Supported	Best Use Case
SOL	Solana	Fast, low-fee transfers
TON	TON Network	Telegram ecosystem users
BNB, TRX, XRP	Multiple	Collateral for Credit feature

Who Benefits Most from RedotPay?

RedotPay's referral bonus and card ecosystem are designed for specific user profiles. Understanding where the platform shines helps you decide whether it fits your financial needs.

Best Suited For	May Not Be Ideal For
✓ Stablecoin holders who want to spend crypto daily	✗ US-based users (not currently available in the US)
✓ Frequent international travelers and global nomads	✗ Users who prefer self-custody wallets
✓ Crypto earners seeking passive yield on idle stablecoins	✗ Users wanting cashback or travel reward points
✓ Users in countries with limited traditional banking	✗ Heavy ATM users sensitive to withdrawal fees
✓ P2P traders using USDT for local currency exchange	✗ Small-spend users where FX fees outweigh convenience

Security, Compliance, and Regulatory Standing

A crypto spending card is only as trustworthy as the infrastructure behind it. RedotPay has built its compliance stack around institutional standards rather than relying on minimal regulatory frameworks.

- **Fireblocks Custody** — assets are custodied by Fireblocks, the same institutional-grade crypto custody provider used by major exchanges and financial institutions globally.
- **PCI DSS 4.0 Certification** — RedotPay holds the latest payment card security standard, protecting card data during every transaction.
- **Sumsub KYC and AML** — identity verification and anti-money laundering monitoring are handled by Sumsub, a globally recognized compliance technology provider.
- **\$42 Million Insurance** — user assets are insured up to \$42 million, a level of protection uncommon in the consumer crypto card space.
- **Multi-Jurisdiction Licensing** — RedotPay holds a Hong Kong Money Lender and TCSP license, is a FinCEN-registered MSB in the United States (for infrastructure purposes), a VASP in Argentina, and an MSB in Canada.
- **Circle Partnership** — direct partnership with Circle, the issuer of USDC, provides added stablecoin infrastructure reliability.

Frequently Asked Questions

Q: Can I add the rjvq1 code after I have already registered?

A: No. RedotPay's official policy states that referral codes must be entered during the registration process. They cannot be applied to existing accounts under any circumstances.

Q: How long does it take to receive the \$10 bonus?

A: The welcome bonus is credited once you complete KYC and your first card activation is confirmed. For a virtual card this typically takes less than an hour from registration to bonus credit.

Q: Can I use the \$10 bonus to pay for the virtual card issuance fee?

A: No. According to RedotPay's help center, the welcome bonus cannot be used to pay for virtual or physical card application fees. It is credited to be used for purchases at supported merchants.

Q: Is RedotPay available in my country?

A: RedotPay operates in over 100 countries. It is not available to US citizens for card services, and certain Middle Eastern, Ukrainian, and Russian users also face restrictions. Check the official RedotPay website for the most current list of supported regions.

Q: What is the spending limit on a RedotPay card?

A: RedotPay offers some of the highest limits in the consumer crypto card category: up to \$100,000 per transaction and up to \$1,000,000 per day, positioning it as viable even for high-volume business spending.

Ready to Claim Your \$10 Bonus?

1. Download the RedotPay app • 2. Enter code **rjvq1** at registration • 3. Complete KYC • 4. Activate your card • 5. Receive your \$10 welcome bonus
