

Base App Referral Code **DB9LBD5T**

The Complete Guide to Getting 10% Off Your Swap Fees

QUICK ANSWER

Use Base App referral code **DB9LBD5T** when creating your account to unlock an instant **10% discount on all swap fees**. Enter the code at the referral field during signup. No minimum deposit required. Benefit applies immediately after account creation.

What Is the Base App Referral Code?

The Base App referral code **DB9LBD5T** is a promotional invite code that new users enter during account creation to receive an immediate 10% discount on crypto swap fees. Base App, formerly known as Coinbase Wallet, is a self-custody Web3 platform built on the Base blockchain, an Ethereum Layer 2 network developed by Coinbase. Entering a valid referral code at signup is the simplest way to reduce your onchain trading costs from day one, without any complex conditions or minimum balance requirements.

Whether you are new to decentralized finance or an active onchain trader looking to cut transaction costs, the Base App promo code DB9LBD5T gives you a meaningful fee reduction every time you swap tokens across supported chains including Ethereum, Base, Solana, BNB Chain, Optimism, Avalanche, Polygon, and Arbitrum.

What Is the Base App?

Base App is the rebranded version of Coinbase Wallet, relaunched as an all-in-one onchain platform that combines a self-custody crypto wallet, token swapping, DeFi access, social features, encrypted chat, mini apps, and USDC payments in a single interface. The app is built on Base, Coinbase's Ethereum Layer 2 blockchain, which processes transactions faster and at a fraction of Ethereum mainnet costs.

Core features of the Base App include:

- Token swaps across 2 million+ assets on Base, Solana, Ethereum, BNB Chain, Optimism, and more
- Self-custody wallet giving users full control of their private keys
- Up to 4.1% APY on USDC, paid monthly directly into your wallet
- NFT storage and management with automatic asset detection

- In-app social feed and onchain discovery for trending coins and creator content
- Encrypted chat for sending crypto and sharing coins with contacts
- Base Pay for instant USDC checkout at supported merchants
- Browser extension for desktop dApp and Web3 access
- Available in 170+ countries and 20+ languages
- Compatible with existing MetaMask and Trust Wallet seed phrases

Why Swap Fees Matter for Crypto Traders

Every time you exchange one token for another inside a crypto wallet, the platform charges a swap fee on top of the underlying blockchain network gas fee. For frequent traders, these costs accumulate quickly and directly reduce your net returns. Even a 10% reduction in swap fees translates into real savings over weeks and months of active trading.

Swap Volume (USD)	Standard Fee (est.)	Fee With DB9LBD5T	You Save
\$500	\$2.50	\$2.25	\$0.25
\$2,000	\$10.00	\$9.00	\$1.00
\$5,000	\$25.00	\$22.50	\$2.50
\$10,000	\$50.00	\$45.00	\$5.00
\$50,000	\$250.00	\$225.00	\$25.00

Table 1: Estimated fee savings using referral code DB9LBD5T across different swap volumes. Actual fees vary by token, network, and market conditions.

How to Use Base App Referral Code DB9LBD5T: Step by Step

Redeeming the Base App invite code is straightforward. Follow these steps carefully to make sure the 10% swap fee discount is applied to your new account.

1

Step 1: Download the Base App

Visit the official App Store (iOS) or Google Play Store (Android) and search for "Base: formerly Coinbase Wallet". Download and install the app directly from the official store listing to avoid counterfeit versions. You can also install the Base browser extension from the official Chrome Web Store for desktop use.

2

Step 2: Start Account Creation

Open the app and select the option to create a new account. The app will walk you through a short onboarding process. You will be given the option to set up with a recovery phrase (seed phrase) for full self-custody, or use a passkey and email-code login for a more beginner-friendly setup. Choose the method that suits your needs.

3

Step 3: Secure Your Recovery Phrase

If you choose the seed phrase setup, write down your 12-word recovery phrase and store it somewhere physically safe and completely offline. Nobody at Coinbase or Base can recover this phrase for you if it is lost. This is the most critical step for protecting your funds.

4

Step 4: Enter the Referral Code DB9LBD5T

During the registration flow, look for a field labelled "Referral Code", "Invite Code", or "Promo Code". Type in **DB9LBD5T** exactly as shown, using all capital letters. Confirm the entry before proceeding. The 10% swap fee discount is tied to correct entry at this stage. The code cannot typically be added after the account is created, so do not skip this step.

5

Step 5: Fund Your Account and Start Swapping

Once your account is active, fund it by connecting a bank account, depositing via card, or transferring crypto from another wallet or from a Coinbase exchange account. You can transfer funds to Base instantly when selecting Base as the destination network. Once funded, navigate to the Swap section and begin trading. Your 10% referral discount on swap fees will apply automatically.

Key Benefits of Using the DB9LBD5T Referral Code

Beyond the headline 10% swap fee discount, using the Base App referral code connects you to a broader ecosystem of savings and features:

- **Instant fee reduction:** The 10% swap fee discount applies to every token swap you execute inside the Base App, meaning savings stack with every trade.
- **No minimum deposit required:** Unlike some competing referral programs that require you to deposit a set amount before bonuses activate, the Base App code simply requires account creation.
- **Access to low network fees:** Base, as an Ethereum Layer 2, already offers transaction fees that are a fraction of mainnet Ethereum costs. Combining Layer 2 efficiency with the referral discount compounds your savings.
- **Multi-chain reach:** The wallet supports swapping across Ethereum, Base, Solana, BNB Chain, Optimism, Polygon, Arbitrum, and Avalanche, so the discount applies across a wide range of

assets.

- **Earn passive yield:** Hold USDC in your Base App wallet and earn up to 4.1% APY, paid monthly with no lockup period.
- **Self-custody security:** Your private keys never leave your device. Coinbase cannot access, freeze, or reverse your wallet funds.
- **Free cross-chain transfers via Coinbase:** Moving funds from a Coinbase exchange account into your Base App wallet on the Base network is instant and carries no additional transfer fee.

Base App vs Other Crypto Wallets: Feature Comparison

Understanding where the Base App referral code discount fits within the wider landscape of self-custody wallets helps you make an informed decision about which platform suits your DeFi and trading needs.

Feature	Base App (DB9LBD5T)	MetaMask	Trust Wallet	Phantom
Referral fee discount	10% off swaps	No	No	No
Layer 2 (low gas) native	Yes	No	No	No
USDC yield (APY)	Up to 4.1%	No	Varies	No
Multi-chain support	Yes	Yes	Yes	Solana focus
Social / onchain feed	Yes	No	No	No
Non-custodial / self-custody	Yes	Yes	Yes	Yes
Fiat on-ramp (card/bank)	Yes	Limited	Yes	Limited
Desktop browser extension	Yes	Yes	No	Yes
NFT management	Yes	Yes	Yes	Yes
dApp browser built in	Yes	Yes	Yes	Yes

Table 2: Feature comparison of leading self-custody wallets. Base App is the only major wallet offering a signup referral discount on swap fees.

Who Should Use the Base App Referral Code?

- **New crypto users:** The Base App provides a beginner-friendly onboarding with email-code login, passkeys, and a link to Coinbase accounts, making it ideal for those stepping into self-custody for the first time while locking in a fee discount.
- **Active DeFi traders:** Users who swap tokens regularly across Ethereum and Base ecosystem dApps such as Uniswap, Aerodrome, Aave, and Morpho will see meaningful savings from the

compounding 10% fee reduction on every swap.

- **Coinbase exchange users:** Anyone already on Coinbase can instantly transfer funds into Base App without an onchain transaction fee, making migration seamless.
- **Multi-chain portfolio holders:** With support for EVM chains plus Solana, users who manage assets across multiple networks benefit from consolidating into a single wallet that also discounts swap costs.
- **USDC yield seekers:** Stablecoin holders who want to earn passive income while retaining liquidity can hold USDC and earn up to 4.1% APY, a feature unique to the Base ecosystem.

Tips for Maximising Your Base App Savings

- Always swap on the Base network when possible. Transaction fees on Layer 2 are already far lower than Ethereum mainnet, so combining L2 efficiency with your 10% referral discount produces the best results.
- Hold USDC in your wallet between active trading periods to earn up to 4.1% APY passively. Rewards are credited monthly directly to your wallet with no lock-up.
- Use Coinbase-funded transfers when moving money from fiat. Depositing via the Base network from a linked Coinbase account is instant and carries no extra bridging fee.
- Explore Base ecosystem dApps directly from the in-app browser. Swapping through the native swap interface ensures your referral discount applies, whereas connecting to external aggregators may route fees differently.
- Stay alert to phishing. No legitimate Base App or Coinbase support agent will ever request your seed phrase or private key. Always use the official app store download link.

Frequently Asked Questions

What is the Base App referral code?

The Base App referral code DB9LBD5T is a signup promo code that grants new users a 10% discount on swap fees when they create an account through the Base App (formerly Coinbase Wallet).

Can I add the referral code after signing up?

In most cases, referral codes must be entered during the account creation process. Once the wallet is created without a code, the discount cannot typically be applied retroactively.

Does the Base App referral code work outside Nigeria?

Yes. The Base App is available in 170+ countries. The referral code DB9LBD5T is not region-restricted and should work wherever the app is supported.

Is there a minimum swap amount to benefit from the discount?

No minimum is specified. The 10% discount applies to eligible swap fees regardless of trade size, making it beneficial for both small and large volume traders.

Is Base App safe to use?

Base App is a non-custodial wallet developed by Coinbase, one of the most regulated and audited crypto companies globally. The wallet never transmits your private keys to Coinbase servers. The main safety risk is social engineering (fake support scams), not the wallet software itself. Always use the official App Store or Play Store link.

What chains are supported for swaps?

The Base App supports token swaps across Base, Ethereum, Solana, BNB Chain, Optimism, Arbitrum, Polygon, and Avalanche, with access to over 2 million tokens.

Do I still pay network gas fees with the referral discount?

Yes. The referral code reduces the platform's swap fee, not the underlying blockchain network gas fee. However, swapping on Base (Layer 2) already carries very low gas costs compared to Ethereum mainnet.

Conclusion

The Base App referral code **DB9LBD5T** is the most direct way for new users to reduce their crypto trading costs from the moment they create an account. With a 10% discount on swap fees, access to a low-cost Ethereum Layer 2 network, passive USDC yield, and a multi-chain trading interface covering millions of tokens, the Base App combines accessibility with genuine financial value.

Entering the code DB9LBD5T at the referral field during signup takes under ten seconds and pays dividends across every swap you execute. For anyone entering the world of onchain trading, self-custody wallets, or DeFi, this is a no-effort, no-cost step worth taking before you make your first trade.
