## Workshop-1

NewFrac brought together 38 international participants

NewFrac brought together 38 international participants for its first face-to-face event, **Workshop-1**.

After months of uncertainty and instability, the first project workshop was finally scheduled face-to-face for October 2021.

"**New Strategies in Computational Fracture Mechanics**" tried to boost the development of new strategies in Computational Fracture Mechanics, especially those based on Phase Field and Finite Fracture Mechanics.

The main objective of the NewFrac-1 Workshop and the main reason to fight for its celebration in person, was to bring all ESRs and their supervisors together and involve them in the NewFrac network, to get their strong commitment to the project objectives and to foster multiple interactions and collaborations among them and with students and scientists outside the project in the same field as well as to promote exchange with young researchers from industry and academia.

It was a total success!!

# Early-Stage Researchers

Recruitment process for all positions is now closed

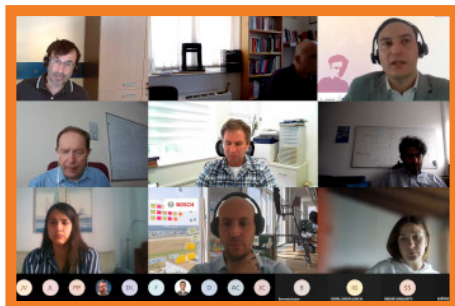

Following the re-opening of the ESR06 position again in July 2021, we are pleased to announce that **the recruitment process for all the Early-Stage Researcher (ESR) positions is now closed**. The 13 ESRs have been finally selected and the list completed.

After months of uncertainty and instability, nine of the thirteen ESRs have already started their first planned **secondments**, stays at other beneficiaries/companies to obtain specialised training.

## Main Events

### EVENTS:

**Mid Term Meeting:** 'Mid-term meeting' between the beneficiaries, entities with a capital or legal link, partner organisations and the Agency.

It was initially scheduled in January 2021 (Month13), but due to COVID - pandemic situation, it was rescheduled for July 5<sup>th</sup>, 2021.

**European Reseracher's Night:** Through the stand "Do you want to know when things break? - Can we predict it?" at the European Researchers' Night in Seville las 24th September 2021, NewFrac ESRs made known and explained in a simple and straightforward way what this research projectis all about in a 45-minute contribution.
